

WSCF WEBSITE STATEMENT 2026-2027

We are delighted to have received £7,500 in funding from the Wiltshire and Swindon Community Foundation for 2026-2027 to support our learners through vocational grants, enabling us to provide timely financial assistance without the need for individual funding applications for each student. This funding helps remove practical barriers to career development and gives our learners greater access to meaningful vocational opportunities.

Grants may be used for essential items such as CSCS cards and associated costs, appropriate clothing and equipment for work experience, and career workshops, workplace visits and practical experiences with local organisations and businesses.

By investing in these opportunities, we can help our learners build confidence, develop employability skills, and gain valuable real-world experience that supports their progression into further education, training and employment.
